

Portfolio Website

Solo or team?: Solo

Personal or School?: Personal

Approximate date: September/October 2024

Welcome to my portfolio site! I designed this website to showcase my progress, knowledge, and expertise as a developer, and to give you some insight into who I am as a human being. I hope that you enjoy using my site, and that you find it easy to use, clear, informative, and a positive experience as a whole.

I designed this website from scratch using VSCode, Javascript, HTML, Tailwind CSS, ShadCN, and Next.js.

Check out my Github page to view the code!
